## Digital Speakerphone

### 16-Character LCD

The one-line, 16-character display switches to show you either the caller's name or telephone number\* so you're ready to provide good customer service the moment you answer. It also shows the date and time, call log, call duration, calling extension's number, and other useful information.

\*To see the caller's name, the name and number must be registered in the PBX. To see the caller's number, you must subscribe to ISDN or an Analogue Caller ID Service.

### Tilt-Angle Adjustment

The telephone adjusts to either of two angles for easier use and a smaller, space-saving footprint.

### Programmable CO Keys with Dual-Colour LED

These eight keys can be assigned to PBX functions such as Call Forward(FWD) / Do Not Disturb (DND), and Conference. Each has a dual-colour LED that shows the line status, extension status, on/off, and other information.

### Digital XDP (eXtra Device Port)\*

The Digital XDP allows you to increase the number of digital telephones without the need for additional cards, thus letting you improve your productivity.

\*Digital XDP is only available when you use KX-TDA100/200 Ver.1.1 or later.

### Message / Ringer Lamp

The easy-to-see lamp illuminates to indicate when a call comes in, so you can tell when the telephone is ringing even from a distance. It also notifies you that someone has left a message.

### ◆ Specifications

	KX-T7665
